

Central Everglades Planning Project Configuration Summary Sheet

Configuration Name: Establish a Unique and Descriptive Name of the Proposed Configuration.

TRAVESTY

Author of the Configuration: Identify the name of the Author that developed the Configuration during the exercise.

BARBARA SUSCO

Configuration's General Description: This description should be able to convey the general aspects, elements, and general location of management measures in this configuration.

THIS IS COMPARTMENTALIZATION
AT ITS BEST (OR WORST, DEPENDING ON VIEW)
WE CANNOT PROPOSE WATER FLOWS & STORAGE
WITHOUT SEEING THE BIG PICTURE. THIS IS TOO
CLOSE TO THE 2000 ACRES PALM BCH CITY GAVE TO
BROWARD SO WE NEED TO KNOW HOW THAT LAND WILL BE
USED AS THE ENTIRE SYSTEM HAS TO WORK TOGETHER.

Management Measures: List the management measures used in the configuration (Deep Storage, Shallow Storage, STA, Restored Wetland, ASR).

How Water Flows Through the Configuration: This description should identify the travel route of the water that the configuration will be managing. Identify where the water is coming from and where it goes. The Author should be able to generally describe how the water gets from the originating water source (for example, Lake Okeechobee) to the final destination of the water.

Objectives: Identify and prioritize (rank) the specific CEPP Objectives that the configuration is intended to meet (use the list of Objectives as needed).

Anticipated Benefits General Description: Identify why the Author chose the features in the configuration. List, prioritize and provide a general description of any benefits anticipated from the Proposed Configuration.

Operating Assumptions General Description: List anything specifically that the Author wants relative to the operation of the configuration. Examples might be operational changes within the confines of the LO Schedule to maximize improvements to water supply or the environment, or both; specific high and low levels for Lake Okeechobee; maximize pulse discharges or modify timing to natural system; manage project features wet or dry.

Other Key Elements: List the main Considerations that have not been mentioned elsewhere on this Form. Examples may include Water Supply in the Lake Okeechobee Service Area; deliver all available water to Florida Bay; Recreational Opportunities; etc.
