

**Project Name:** C&SF: CERP Lake Trafford Restoration  
**Project ID:** 1725  
**Lead Agency:** USACE / SFWMD  
**Authority:** Not authorized  
**Funding Source:** Federal/State

**Strategic Plan Goal(s) Addressed:** 2-A.3

**Measurable Output(s):** 2.85 million cubic yards of organic sediments removed

**April 1999 (Restudy) Project Synopsis:** Lake Trafford, the largest lake south of Lake Okeechobee, with a surface area of approximately 1,494 acres, is located in north Collier County. The project is described in the *Central and Southern Comprehensive Review Study (1999)* as an OPE, utilizing one or more 14-inch portable cutter dredges to accomplish lake-wide organic sediment removal.

**Current Project Synopsis:** Same as Restudy. T

**Current Status:** Portions of this project are currently being pursued under a different program. Please see Project ID 1702.

**Est. Cost:** \$20,821,000

**Project Schedule:** The CERP project has not begun.

**Detailed Project Budget Information (rounded):**

| Insert project name | Expenditures Thru<br>FY 2009 |
|---------------------|------------------------------|
| USACE               | \$0                          |
| SFWMD               | \$0                          |
| <b>Total</b>        | <b>\$0</b>                   |
