

**Project Name:** C&SF: CERP Restoration of Pineland and Hardwood Hammocks in C-111 Basin (OPE)  
**Project ID:** 2303 (CERP Project WBS # 92)  
**Lead Agency:** USACE  
**Authority:** WRDA 2000 (*Programmatic Authority < \$25 M*)  
**Funding Source:** Federal/Miami-Dade County

**Strategic Plan Goal(s) Addressed: Primary:** 2-A.3

**Measurable Output(s):** 50 acres pine rockland and tropical hardwood hammock improved

**April 1999 Project Synopsis:** Includes restoring south Florida slash pine and hardwood hammock species on a 200-foot wide strip on each side of two miles of SR9336 from the C-111 Canal to the L-31W Borrow Canal (approximately 50 acres) and the establishment of 2, one-acre hammocks in low-lying areas on each side of the road located in Miami-Dade County.

**Current Project Synopsis:** The project is located in south Miami-Dade County, just east of Everglades National Park (ENP), along State Road 9336 in the area known as the Frog Pond. Eighty percent of the Frog Pond was used for agricultural purposes and farmers plowed the cap rock to create soil for tomato farming. The Frog Pond has since been purchased by the SFWMD as part of the C-111 (South Dade) project to restore the Taylor Slough portion of the Everglades. This project will provide some water quality treatment for runoff passing through the hammocks and demonstrate the techniques required to re-establish native conifer and tropical hardwood forests on land that has been rock plowed.

This project adheres to the original concept described in the Restudy.

**Current Status:** This project has not yet begun and is planned for the future.

**Est. Cost:** \$ 802,000

**Project Schedule:** TBD

**Detailed Project Budget Information (rounded):**

Restoration of Pineland and Hardwood	Expenditures Thru 2011	FY
USACE		\$0
SFWMD		\$0
<b>Total</b>		<b>\$0</b>
