

Project Name: C&SF: CERP Flows to NW and Central WCA 3A (II) (RR)
 Modify G-404 Pump Station (II), Flow to NW and Central Water Conservation Area 3A (RR)

Project ID: 4105 (CERP Project WBS # 11)

Lead Agency: USACE / SFWMD

Authority: WRDA 2000 (Programmatic Authority <\$25 M)

Funding Source: Federal/State

Strategic Plan Goal(s) Addressed: Other

Measurable Output(s): Increased flows to WCA 3A

April 1999 Project Synopsis: Additional flows will be directed to the northwest corner and west central portions of Water Conservation Area 3A by increasing the capacity of the G-404 pump station, currently a part of the Everglades Construction Project, and increasing the capacity and relocating the S-140 pump station. Development of a spreader canal system at S-140 will reestablish sheetflow to the west-central portion of Water Conservation Area 3A.

Current Project Synopsis: The purpose of this feature is to increase environmental water supply availability, increase depths and extend wetland hydropatterns in the northwest corner and west-central portions of Water Conservation Area 3A in western Broward County. If additional water quality treatment is determined to be required as a result of future detailed planning and design work, existing facilities would be modified to provide the necessary treatment. Water quality treatment of flows is assumed to be provided by the Everglades Construction Project and water quality treatment strategies developed to fulfill the Non-Everglades Construction Project requirements of the Everglades Forever Act.

Current Status: This project has dependencies on the Everglades Construction project; and has not yet begun.

Est. Cost: \$ 41,259,000

Project Schedule: TBD

Detailed Project Budget Information (rounded):

| Flows to NW and Central | Expenditures Thru FY 2009 |
|-------------------------|------------------------------|
| USACE | \$59,096 |
| SFWMD | \$7,202 |
| Total | \$66,298 |
