

Lake Okeechobee Watershed Project Configuration Summary Sheet

Configuration Name: Establish a Unique and Descriptive Name of the Proposed Configuration.

Part of The Solution

Author(s) of the Configuration: Identify the name of the Authors that developed the Configuration during the exercise.

Nyla Pipes - One Florida
Darrell Brand - Rivers Coalition - Jim Moir - MRC
Ramon Iglesias - Roland Martin Marina

Configuration's General Description: This description should be able to convey the general aspects, elements, and general location of management measures in this configuration.

(A) Deep reservoir where the state owns land near the Kissimmee River / Lake Okeechobee - acquire more lands to do this. (B) Deep reservoir Istokpoga Canal Region. Double what state owns land mass - (C) Deep reservoir Taylor Creek / Nubbin Slough (D) Identify another area for deep water Reservoirs between C-40 - C41

Management Measures: List the management measures used in the configuration (Reservoirs, ASR, Wetland/Floodplain Restoration).

Reservoirs / ASR Deep water

How Water Flows Through the Configuration: This description should identify the travel route of the water that the configuration will be managing. Identify where the water is coming from and where it goes. Generally describe how the water gets from the originating water source (for example, which existing canals/tributaries are used or if new conveyance features are needed) to the final destination of the water.

we concentrated on moving water to & from Deep water Reservoirs

Objectives: Identify and prioritize (rank) the specific LOWP Objectives that the configuration is intended to meet (use the list of Objectives as needed).

Storage - 200,000 PLUS AF !!

Anticipated Benefits General Description: Identify why the Author(s) chose the features in the configuration. List, prioritize and provide a general description of any benefits anticipated from the Proposed Configuration.

The V/F Report makes it very Clear we need more Storage and the ability to MOVE water.

Operating Assumptions General Description: List anything specifically that the Author(s) want relative to the operation of the configuration.

flexibility within the Storage -
ability to convey water between
Reservoirs, canals, and the
Lake Okechobee

Other Key Elements: List the main Considerations that have not been mentioned elsewhere on this form. Examples may include potential Recreational Opportunities or Concerns.

STRUCTURES
were not included in our
"plan" due to time constraints
(we were slow)
