

South Florida Ecosystem Restoration Land Acquisition Strategy

Federal Projects and Joint Federal/State Projects

DATA SOURCES

- SFWMD provided digital data for CERP Projects 2001-12 and Save Our River (SOR) Projects 2001-11.
 [Disclaimer: Any information, including but not limited to software and data, received from the South Florida Water Management District ("District") in fulfillment of a request is provided "AS IS" without warranty of any kind, and the District expressly disclaims all express and implied warranties, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. The District does not warrant, guarantee, or make any representations regarding the use, or the results of the use, of any information provided to you by the District in terms of correctness, accuracy, reliability, timeliness or otherwise. The entire risk as to the results and performance of any information obtained from the District is entirely assumed by the recipient. This map is not self-extracting or binding, and does not otherwise affect the interests of any persons including any vested rights or existing uses of real property.]

- US Fish and Wildlife Service (USFWS) provided digital boundary files of National Wildlife Refuge (NWR) Acquisition Projects 2001-08 through 2002-04. Boundaries of Ding Darling NWR Acquisition Project were not yet available.

- US Army Corps of Engineers provided digital data for Other Federal Acquisition Projects (i.e., 8.5 Square Mile Area) 2002-01.

- The Conservation Lands data layer was compiled by the Florida Natural Areas Inventory (FNAI) using data received from many different sources including federal, state, and local managing agencies and private conservation organizations.

- The Florida Forever Board of Trustees (BOT) Projects data layer represents projects on the Florida Forever BOT Acquisition List as of 2001-04. Boundaries were digitized by FNAI staff using paper maps provided by FDEP Office of Environmental Services.

LEGEND

- The Conservation Lands data layer (light gray) depicts all lands acquired as of 2001-09-30 for conservation or restoration purposes, regardless of funding source.
- Project data layers [CERP, USFWS or National Park Service (NPS), Other Federal, and Joint State/Federal Acquisition Projects] depict the full extent of the acquisition project boundaries, including any lands that have already been purchased (acquired lands are colored gray within the project boundaries). Some projects are greater than 90% complete; in many of these cases, the remaining inholdings within the project boundaries are too small to be shown on this map.
- The Joint State/Federal Acquisition Projects data layer (pink cross-hatching) is composed of Florida Forever BOT Projects and SOR Projects that have federal involvement.
- CERP Project Conceptual Boundary
 - USFWS Project or NPS Project
 - Other Federal Acquisition Project
 - Joint State/Federal Acquisition Project
 - Conservation Land
 - Tribal Land
 - SFWMD Boundary
 - County Boundary
 - Lake
 - River
 - Interstate
 - U.S. Highway
