

Integrated Delivery Schedule Sequencing Plan Summary Sheet

Sequencing Plan Name: Establish a Unique and Descriptive Name of the Proposed Sequencing Plan. *Greater Everglades/Northern Estuaries Project*

Author of the Sequencing Plan: Identify the name of the Author(s) that developed the Sequencing Plan during the exercise and identify spokesperson if applicable.

Mark Perry

Anticipated Benefits: Identify geographic, ecological, hydrological, and/or economic benefits of your sequencing plan.

Sequencing Plan: Identify projects in your recommended order of sequencing. (i.e. what projects show go below the black line on the Draft IDS Worksheet)

1. *EAA STORAGE Reservoir - (Phase 1+2) - (G-P1+2)*
2. *Lake Okeechobee Watershed - (A,W,OPE)*
3. *Modify Holey Land (DD) + Modify Rotenberger (EE)*
4. *Replace LAKE Okeechobee ABR with Above projects*
5. *~~LAKE~~ CEPP - North, South + New Water*
6. *LAKE Okeechobee Regulation Schedule.*

CERP Goals: Identify which CERP goals your sequencing plan contributes towards and to what extent.

Dependencies: Identify predecessor projects that impact your sequencing plan.

A-1 + A-2 - FEBs must be completed for dynamic shallow storage (and treatment) for water from "New" EAA Reservoir south to STAs and WCAs and Everglades.

Other Considerations: Any other factors that were relevant in developing your sequencing plan.

Need to shorten 10-year timeframe to complete "Restoration Strategies" - As completed other construction of dependent projects can start.
