

Southern Golden Gate Estates
Hydrologic Restoration
Presentation to Task Force
3 December 2003

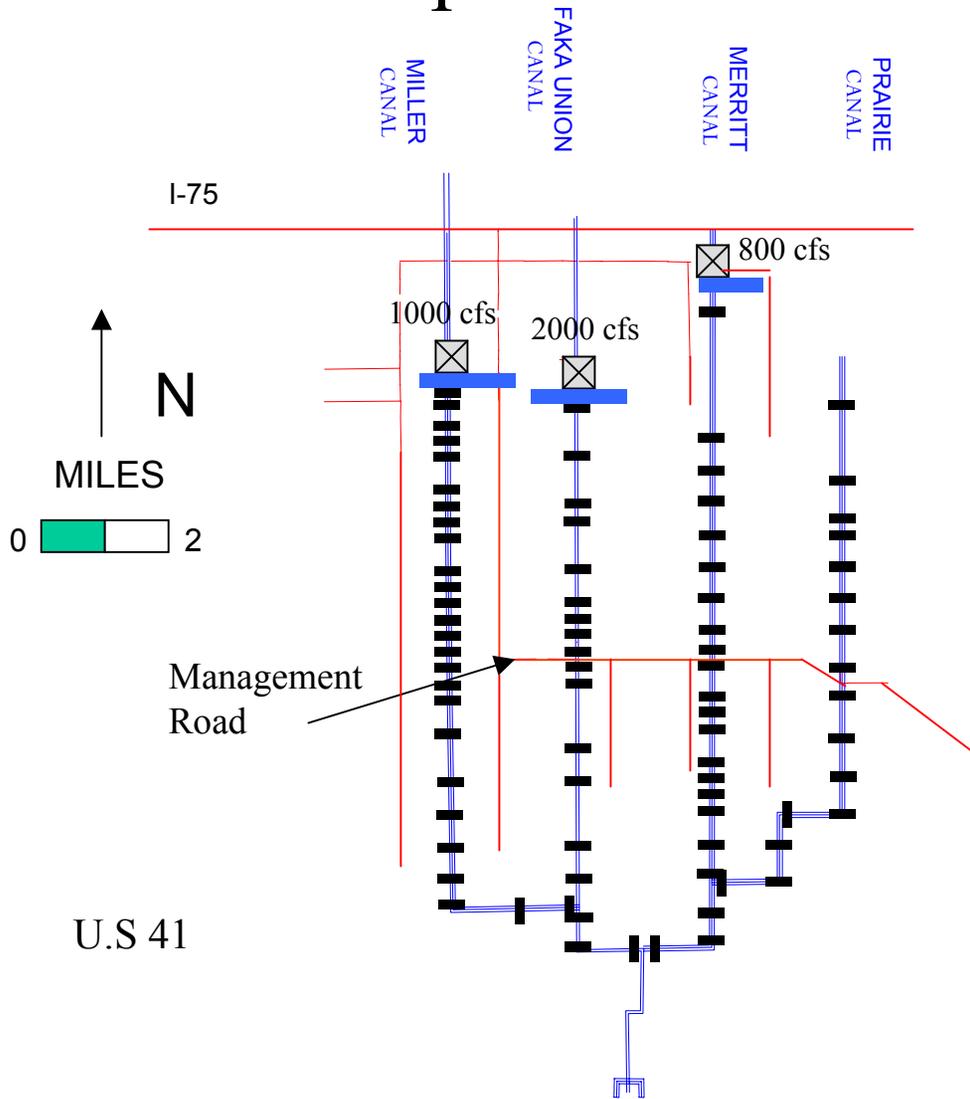

Southern Golden Gate Estates Hydrologic Restoration Study Area

Alternatives

- A total of 19 alternatives have been devised for the project
- Alternatives range in scope from filling all canals south of I-75 to construction of large pump stations
- All alternatives include road removal and removal of exotic vegetative species
- Project Delivery Team has reduced alternatives to 3 viable alternatives which produce desirable environmental restoration and flood protection of residents in North Golden Gate Estates

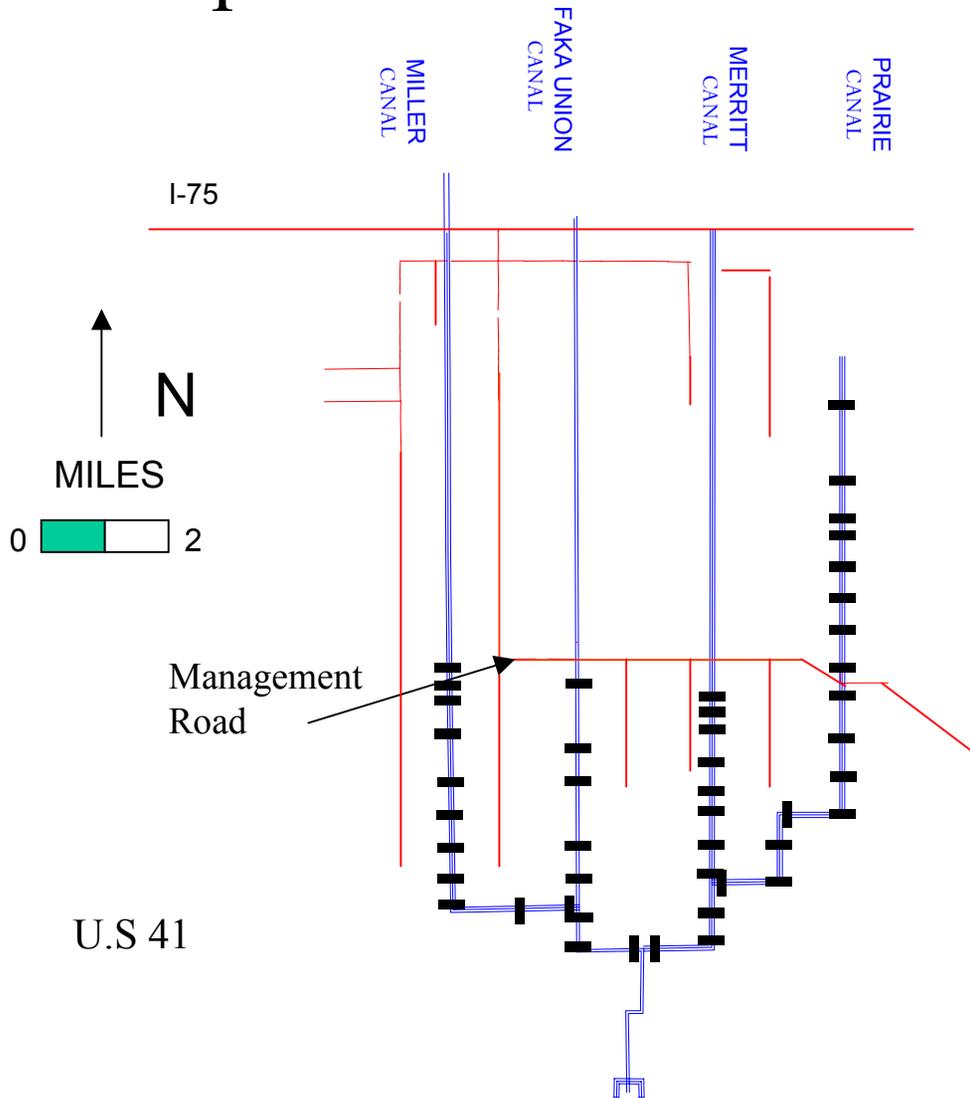

Alternative 3D - Most Roads Removed and Northern Spreader

Elements

-  - 3 Spreaders
-  - 3 Pump Stations
-  - 83 Canal Plugs
- 227 miles of Road Removed

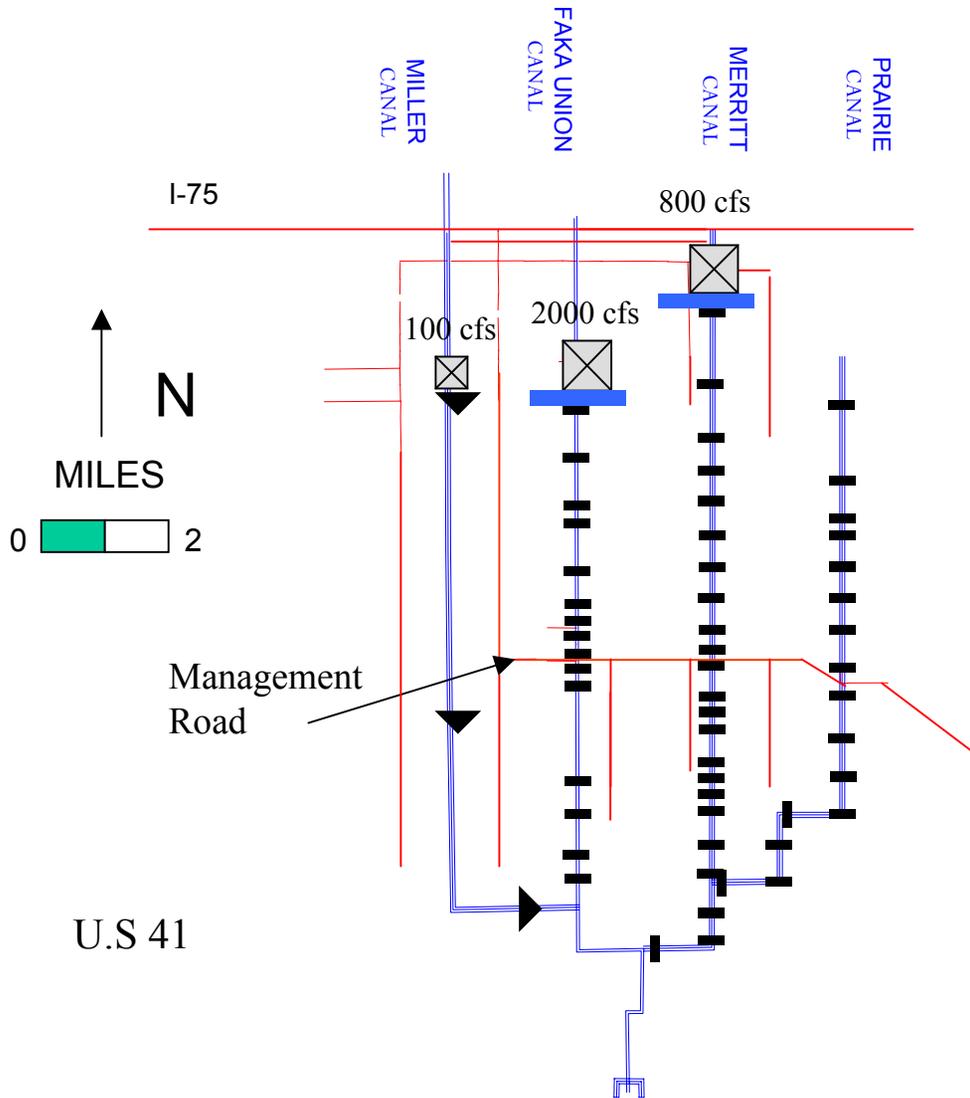

Alternative 6 - Most Roads Removed and No Pumps

Elements

- No Spreaders or Pump Stations
- 46 Canal Plugs
- - 227 miles of Road Removed

Alternative 12

Elements

-  - 2 Spreaders
-  - 3 Pump Stations
-  - 64 Canal Plugs
-  - 3 Obermeyers in Miller Canal
- 227 miles of Road Removed

Status of Project Implementation Report

- Modeling of final array of alternatives is ongoing.
- Real Estate and economic analysis will be completed when modeling is complete
- Completion of the Draft PIR with all Appendices scheduled for release early January 04.
